UNIQUE INNOVATION IN BIO TECHNOLOGY

The Biomat's 17 layers consist of:

- 1 Surface material: Silicon urethane with cotton
- 2 Waterproof layer
- 3 Amethyst layer for transferring natural infrared rays
- 4 Hyron cotton layer for thermal insulation
- 5 TOCA layer for natural negative ions
- 6 Nano Copper fabric layer
- 7 Quantum Energy layer (peach and grape seeds)
- 8 Copper fabric layer for electromagnetic interception
- 9 Carbon fiber layer for electromagnetic interception
- 10 Fiberglass layer
- 11 Thermal preservation layer
- 12 Silicon and Teflon reverse currency heating layer with EMF interception
- 13 Nonwoven fabric layer
- 14 Aluminum layer for reflection of infrared rays
- 15 Nonwoven fabric layer for heat preservation
- 16 Thermal protection layer
- 17 Bottom material: High quality cotton with brass pattern

CONTROLLER FEATURES

SOFT TOUCH POWER SWITCH AND TEMPERATURE/TIMER CONTROL

The Biomat 7000mx's control system has many useful functions for setting the temperature, timer, and it even has the most advanced I.C. chip to reduce electromagnetic waves.

Alarm Light

This light will appear if there is any malfunction. If so, check connections to ensure they are secure. Contact the dealer if you are experiencing any issues.

Temperature Indicator (Celsius)

Temperature Up

Temperature Down

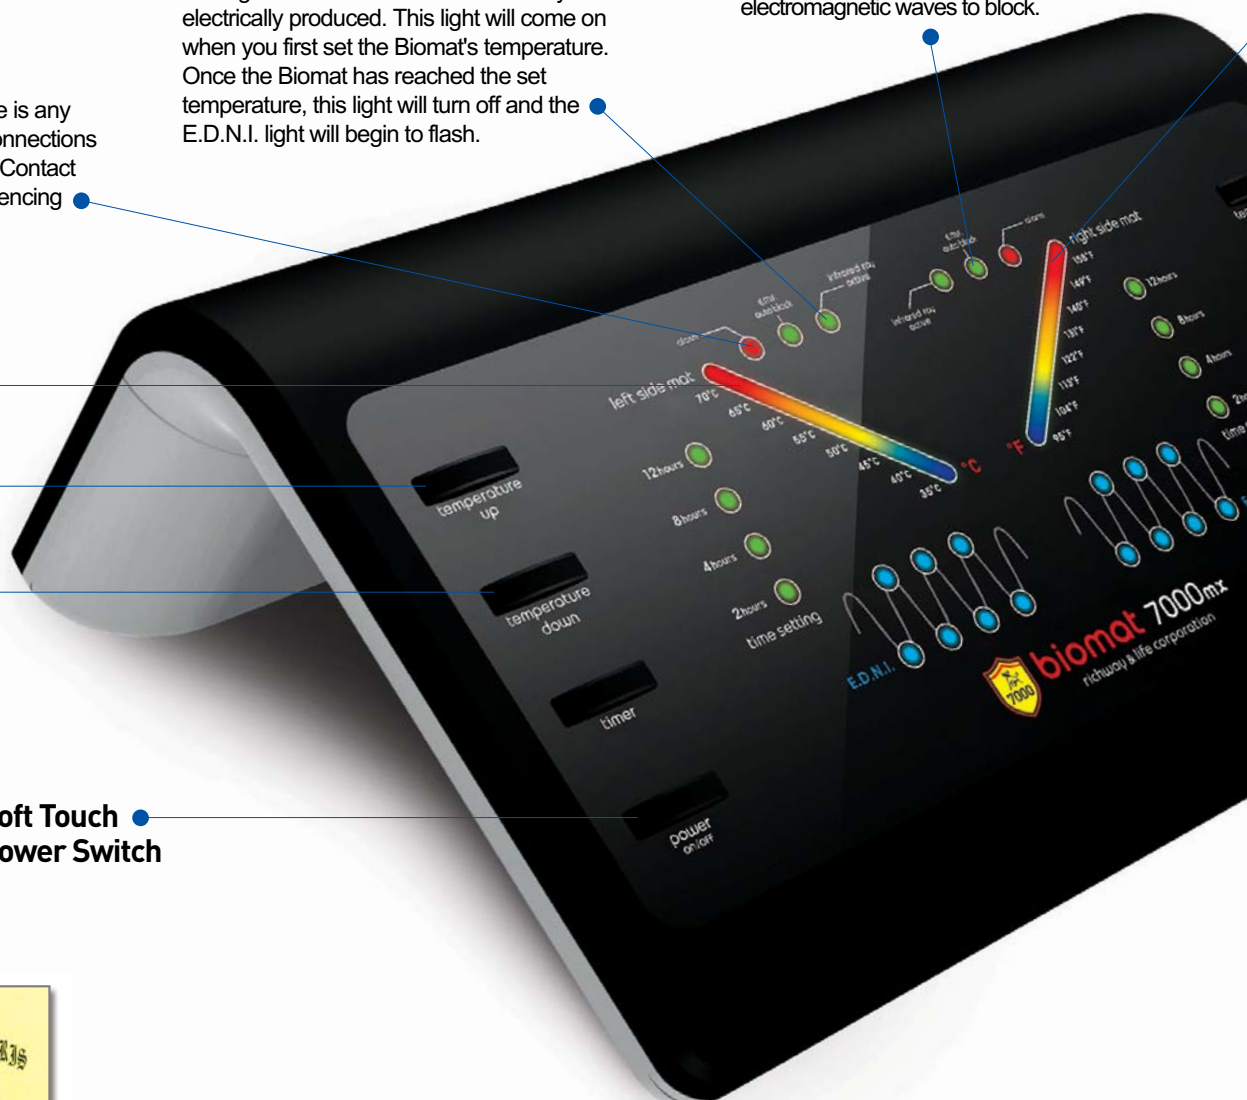

F.I.R. Indicator (Far Infrared Ray)

This light indicates when far infrared rays are electrically produced. This light will come on when you first set the Biomat's temperature. Once the Biomat has reached the set temperature, this light will turn off and the E.D.N.I. light will begin to flash.

E.M.F. Interception Light

This lights up to indicate the active reduction of harmful electromagnetic waves. It turns off if there are no electromagnetic waves to block.

Press Release: The 1991 Nobel Prize in Physiology or Medicine
NOBELFORSAMLINGEN KAROLINSKA INSTITUTE
THE NOBEL ASSEMBLY AT THE KAROLINSKA INSTITUTE

The Nobel Assembly at the Karolinska Institute has decided to award the Nobel Prize in Physiology or Medicine for 1991 jointly to Erwin Neher and Bert Sakmann for their discoveries concerning "the function of single ion channels in cells". According to *The Cell*, their research established the existence of ion channels in cell membranes, some of which permit the flow of positively and negatively charged ions, leading to the examination of a broad range of cellular functions. Eventually this led to discovering the role that ion channels play in diseases and certain disorders, enabling the development of new therapies.

Product testing is about testing tomorrow's products today to ensure they comply with regulatory requirements and industry standards. It also identifies how the manufacturer's product will perform in the marketplace for the end user or consumer. TÜV also compares similar products to ensure the manufacturer's product has a competitive edge. Testing helps companies to develop safer, greener products and to run safer operations with better integrity and a lower social and environmental impact. TÜV helps companies to comply with the safety, quality and environmental regulations of today and in the future. TÜV helps companies build trust and value in their businesses!

Comparison of Normal Heat and Biomat Far Infrared Rays

After using a conventional heating pad for 10 minutes
Only the outer surface of the skin is affected in this area

After 5 minutes of using far infrared rays
Far infrared rays can penetrate the skin much deeper compared to other types of heat

There are two types of heating applications here. One is the simple application of a conventional heating pad, while the other is the result of far infrared rays. One of the main focuses of attention during the 21st century will be on these methods of heating the body using far infrared rays.

✓ What is EMF?

EMF (Electromagnetic Fields) is a term used to describe the invisible electric and magnetic fields radiating away from man-made alternating electrical current. EMF radiates from all electrical appliances in the home, office or factory, in cars, trucks, buses and overhead tram and train lines.

What does the Biomat EMF interceptor do?

The Biomat EMF Interceptor acts in the same way as a lightning rod by safely conducting the EMF energy away to the ground. With this feature, you can effectively reduce exposure to EMF for yourself and your family.

Biomat EMF Reduction Levels fall well within safety levels established by the FCC (United States), VED (Germany), and CISPR (World).

These images show circulation before and after 14 days of Biomat usage. Note the increase in circulation.

According to the American Heart Association, the circulatory system is responsible for the delivery of oxygen-rich blood and the removal of wastes. In Dr. Inoue and Dr. Kabaya's paper entitled "Biological activities caused by far-infrared radiation", far infrared rays have been found to have a blood circulation-enhancing effect in human skin and eventually induces an increase in temperature of the body tissues.
